**Summary of Financial Statements
For the Interim Period of Fiscal 2008**

May 15, 2008

Company Name: FinTech Global Incorporated (Code Number: 8789 TSE Mothers)
 (URL: <http://www.fgi.co.jp/>) TEL: (03) 5733-2121
 Responsible: President and Chief Executive Officer Name: Nobumitsu Tamai
 For Inquiries: General Manager, Finance Department, Name: Seigo Washimoto
 Corporate Strategy & Planning Division
 Scheduled reporting date for the Interim Period of Fiscal 2008: May 27, 2008
 Scheduled starting date of dividend payment: June 13, 2008

1. Overview of the financial conditions and business results for the interim period of fiscal 2008.
(October 1, 2007 – March 31, 2008)

(1) Business results (The percentage in the table indicates YOY changes.)

	Revenue		Operating income		Ordinary profit		Net income

* Information concerning proper use of forward-looking statements and other special instructions

Forward-looking statements in this material are based on data available to management as of May 15, 2008 and certain assumptions which are believed to be rational. Actual results may differ from these estimates due to unforeseen factors.

I. Business Results and Forecasts

(1) Performance Analysis

(Consolidated business results for the first half of fiscal 2008)

During the interim period, the domestic economy was characterized by sluggish business conditions, largely because of the upheaval that the U.S. subprime mortgage crisis triggered in financial markets around the world as well as the skyrocketing price of raw materials, particularly crude oil, and upward movement of the yen against major currencies, especially the U.S. dollar. It is uncertain at this point in time what direction these issues will take next.

Against this backdrop, FGI continued to receive financing inquiries, mainly for bridging loans, which help to finance property development projects before building permits are obtained, and loans for development-style securitization. But given the state of financial markets, financial institutions at home and abroad remained reluctant to extend non-recourse loans to facilitate property-development projects, which made it more difficult for FGI to arrange structured financing.

To deal with real estate price adjustments, FGI introduced tougher screening standards for investments and loans, effective from October 2007, and began taking a more selective approach to the projects for which it would arrange financing. This narrower perspective limited the number of new investments and loans extended. In addition, the tougher lending stance of some domestic and overseas financial institutions hindered the Company's ability to source funds for structured financing transactions, forcing the cancellation of some arrangements. It has become much harder for FGI to execute structured finance transactions.

In regard to a large-scale project financing transaction that could not be completed as planned by the end of fiscal 2007, FGI undertook a review of the format applied to this transaction in the first quarter. Although an equity stake was subsequently taken in a silent partnership (*tokumei kumiai*) for a special purpose company (SPC) with property to develop, and the SPC was brought into the scope of consolidation, this transaction is still under arrangement.

In December 2007, SP&W Asclepius Investment Partnership No. 4, a consolidated subsidiary of the Company, contributed ¥2.2 billion into a scheme set up to raise capital, primarily for the purchase of medical equipment.

The amount was supposed to have been repaid in March 2008 but is still outstanding, presenting a situation with all the markings of fraud. Therefore, FGI is cooperating fully in the official investigation by the authorities as well as seeking methods to recover as much of the investment as possible.

Through a series of transactions, the investment was backed by listed stock, the market value of which stood at about ¥1.9 billion on March 31, 2008. Based on self-assessment standards set forth in the Financial Services Agency's financial inspection manual, the Company conservatively estimated the investment collateral at a value of about half the market value and decided to transfer ¥1,268 million from allowance for doubtful accounts to selling, general and administrative expenses, applicable to consolidated and non-consolidated interim accounts.

Among subsidiaries, FX Online Japan Co., Ltd. (FXO) warrants mention for posting favorable results from its foreign exchange margin trading business. Juxtaposing this solid performance were the results of Stellar Capital AG and Crane Reinsurance Limited, which saw returns on fund management operations eroded by foreign exchange losses and evaluation losses on marketable securities due to the soaring accent of the yen against the U.S. dollar and major changes in the market environment. Therefore foreign exchange losses and evaluation losses of subsidiaries amounted to ¥475 million and were booked under other expenses. This is an aggregate amount that includes ¥120 million recorded in the first quarter.

Despite the challenges that the FGI Group encountered, consolidated revenue jumped 45.7%, to ¥8,961 million. However, the transfer from allowance for doubtful accounts to selling, general and administrative expenses had a significant impact on profits, as operating income fell 11.6%, to ¥2,312 million, ordinary profit tumbled 32.7%, to ¥1,636 million, and the Group posted a net loss of ¥415 million, compared with net income of ¥1,222 million in the corresponding period a year ago.

Segment performances are presented below.

1. Investment Banking Business

1) Arrangement Operations

i) Arrangement Services

The operating environment in the second quarter was as challenging as in the first quarter, limiting the completion of transactions, excluding those with credit enhancement, to 15. Despite the contribution of profits from a large-scale transaction that was completed in the first quarter, arrangement services generated ¥1,825 million in the first half, down 27.4% year-on-year. Gross profit fell 26.7%, to ¥1,760 million.

ii) Arrangement Services with Credit Enhancement

No transactions required credit enhancement from Stellar Capital in the first half of fiscal 2008, but FGI itself provided credit enhancement on one transaction. One jointly arranged transaction also required credit enhancement.

As a result, revenue from arrangement services with credit enhancement retreated 63.6%, to ¥109 million, and gross profit followed suit, backtracking 63.3%, to ¥106 million.

All told, arrangement operations showed a 31.2% drop in revenue, to ¥1,934 million, and a 30.7% decline in gross profit, to ¥1,866 million.

2) Principal Finance Operations

The Group's investment and loan balance settled at ¥48,270 million. This is an aggregate amount comprising non-consolidated investments in securities, trade and loans receivable, trade as well as short-term loans to subsidiaries involved in investment and lending activities. It does not include subsidiaries' cash deposits. The first-half balance was 34.7% higher than at the end of the first half a year ago, but 2.4% less than at the end of fiscal 2007 six months ago.

In conjunction with a review of the format applied to a large-scale project financing transaction, an FGI subsidiary took an equity position in the silent partnership (*tokumei kumiai*) that had invested in a real estate fund SPC established to facilitate the transaction. The property for development held by the SPC that was brought under consolidation through the contribution of funds has been booked as inventory on FGI's consolidated balance sheets.

The investment did not generate any dividends—cash or otherwise—for FGI. This and the fact that tougher screening standards on regular transactions limited investment and loan activity led to sluggish growth in fees and interest income.

Consequently, principal finance operations marked a 10.7% decrease in revenue, to ¥1,263 million. But gross profit edged up 1.0%, to ¥1,121 million.

3) Other Investment Banking Operations

Revenue from other investment banking operations includes commissions and fees from administrative services as well as income generated by FinTech Global Securities, Inc. (FGS), in its capacity as an agent for special investors to provide products, such as privately placed funds registered overseas, and to handle private placement of domestic securitized transactions.

FGS is engaged in the securitization of principal loan credits and finds investors for the structured finance arrangements put together by FGI. Complementing FGI's own activities, FGS will strive to elicit new synergies from a groupwide perspective to reinforce capabilities.

Unfortunately, revenues from other investment banking operations in the first half of fiscal 2008 tumbled 85.8%, to ¥34 million, and gross profit was close behind, dropping 85.9%, to ¥33 million.

Consequently, revenues from investment banking business decreased 27.7%, to ¥3,231 million, and gross profit declined 25.3%, to ¥3,021 million.

2. Reinsurance/Financial Guarantee Business

Stellar Capital did not provide credit enhancement services on any new transactions during the first half of fiscal 2008 but still recorded earnings on guarantees for existing arrangements.

Crane Reinsurance posted revenue from earned premiums under existing policies only, with book-based premiums pro rated according to contract period, because underwriting for new policies is on hold while certain reinsurance underwriting schemes undergo restructuring.

Entrust, Inc. turned a profit in the month of March 2008, buoyed by the results gained through the October 2007 signing of a business outsourcing contract for rent guarantee services with Daiwa Living Co., Ltd., a wholly owned subsidiary of Daiwa House Industry Co., Ltd. Entrust is expected to close the fiscal year in the black.

Given these performances, revenues from the reinsurance/financial guarantee business plummeted 75.0%, to ¥203 million, while gross profit surged 47.5%, to ¥265 million.

Of note, gross profit for Crane Reinsurance far exceeded revenue since reversal of unearned premium reserve of ¥386 million was deducted from cost of revenue.

3. FX (Foreign Exchange) Business

The online foreign exchange margin trading business--the FX (Foreign Exchange) business--is undertaken by FXO. In an intensely competitive field, FXO was able to steadily expand its client base through aggressive marketing efforts. Heightened volatility in foreign exchange markets spurred actively client trading, leading FXO to record-high transaction volume in the second quarter, from January through March 2008.

The FX (Foreign Exchange) business generated revenue of ¥3,847 million in the first half of fiscal 2008 and the same amount in gross profit. Year-on-year performance comparisons are not provided because FXO's results were not included in consolidated accounting until April 1, 2007.

4. Real Estate Related Business

The disposal of property for sale by consolidated subsidiary FinTech Real Estate generated revenue of ¥1,604 million. This amount was complemented by rental income from property owned by SPCs falling under the scope of consolidation as well as brokerage fees.

All told, revenue from real estate related operations zoomed 93.1%, to ¥1,678 million, and gross profit skyrocketed 133.5%, to ¥167 million.

(Full-Year Forecasts)

1. Investment Banking Business

Of securitized real estate transactions, which represent a mainstay in FGI's investment banking business, development-style securitization is particularly popular among businesses involved in property development projects. There is also strong demand for bridging loans, which carry projects through pre-development stages.

However, market interest in securitized credits on loans to finance real estate related projects seems to have stalled in response to the turbulent conditions that arose in financial markets around the world due to the U.S. subprime mortgage crisis.

In this environment, access to funds for real estate applications has suddenly narrowed, especially from foreign-owned financial institutions, and the real estate market itself appears to have entered an adjustment phase after several boom years.

Consequently, investors are increasingly cautious in picking the projects their funds will be used to finance. Prevailing conditions demand that FGI also be meticulous in its screening process and highly selective in the projects it agrees to arrange structured financing for.

In this challenging market environment, the domestic financial institutions that had supplied senior loans for securitized real estate transactions are unlikely to abandon their vigilant stance on lending.

But demand still exists even in a slump, substantiated by stable rental income from office buildings in city centers. This has attracted overseas fund suppliers with sizable capacity--reinforced with oil money from oil-producing nations and pension funds in

developed countries--who are looking for Japanese real estate, which is considered a comparatively inexpensive investment. This kind of investment from abroad will provide a pool of capital for building-oriented equity and mezzanine loans that offer solid return potential.

To help client businesses capitalize on strategic investment activity during this adjustment phase in the real estate market, FGI will act as a conduit between clients and overseas investors and create funds with overseas investors to underpin the arrangement of new fund-procurement schemes. The Company will also infuse arrangements with a higher-value-added quality, such as enhanced project promotion capacity, through credit enhancement from reliable third parties when the participants have weak credit. These efforts will reinforce the arrangement fee income structure with more transactions and strengthen ties to business partners with solid credibility.

To encourage the use of structured financing outside real estate related applications, FGI established a marketing department in April 2008 that is aggressively promoting transactions specifically for projects other than those involving real estate. Working with foreign and domestic financial institutions and venture capital firms as well as our Group member FinTech Global Capital, LLC, which offers advice on venture capital investment, the Company will target listed and seeking-to-list companies with outstanding growth potential that need capital to realize further business expansion. The objective is a wider client base.

FGI expects the investment banking business to generate consolidated revenue of ¥5,177 million in fiscal 2008.

2. Reinsurance/Financial Guarantee Business

Given the fact that Stellar Capital did not provide any guarantees for FGI's arrangements with credit enhancement in the first half, the company is unlikely to increase engage in any new guarantees.

The restructuring of Crane Reinsurance's underwriting schemes has entered the final-adjustment stage with relevant parties to begin underwriting new policies as soon as possible, but the transition to new schemes in fiscal 2008 is fraught with challenges.

Meanwhile, in fund management operations, Stellar Capital and Crane Reinsurance should be able to recover by the end of fiscal 2008 a certain amount of the foreign exchange losses and evaluation losses on marketable securities booked in the first half, given prevailing trends in exchange rates and market conditions.

Consolidated revenue from the reinsurance/financial guarantee business should reach ¥400 million.

3. FX (Foreign Exchange) Business

FXO is expected to enjoy continued revenue growth in the second half of fiscal 2008. The company will maintain its aggressive approach to marketing and focus on client services, especially improved trading conditions, to attract new clients and cement its leading position as an individual-oriented financial services provider. The company will also establish a solid reputation for worry-free trading, through enhanced internal control measures, including more rigorous compliance practices.

The FX (Foreign Exchange) business should contribute ¥7,928 million to consolidated revenue.

4. Real Estate Related Business

Real estate related Business generates revenue from property brokerage, rental income and the sale of buildings linked to development-style securitization arrangements packaged by FGI.

Only transactions expected to be closed by year-end have been included in the fiscal 2008 forecast. Based on this perspective, revenue from real estate related operations should contribute ¥2,120 million to consolidated revenue.

With the above performance estimates in mind, FGI anticipates revenue of ¥15,626 million, operating income of ¥5,024 million, ordinary profit of ¥4,768 million and net income of ¥614 million for fiscal 2008.

Note: Cautionary Statement regarding Consolidated Forecasts

Forward-looking statements, including performance forecasts, presented in these materials are based on information currently available to management of the Company and reflect certain reasonable assumptions. A number of factors could cause actual results to differ greatly from expectations.

(2) Financial Position

Assets, Liabilities and Net Assets

The status of assets, liabilities and net assets, as of March 31, 2008, are as follows.

Current assets stood at ¥99,703 million, up ¥17,455 million from September 30, 2007. This change reflects a ¥14,536 million drop in loans receivable, trade, owing to collection of loans receivable, trade, and a ¥33,831 million gain in inventory, because the equity stake acquired by an FGI subsidiary in a SPC with property for development--booked as inventory--following a review of the format applied to a large-scale project financing transaction was based on a silent partnership (*tokumei kumiai*) agreement that turned the SPC into a business entity and subsequently brought under the scope of consolidation.

Fixed assets reached ¥7,203 million, down ¥1,288 million from September 30, 2007. The decrease comprises a reduction of ¥734 million in goodwill and a reduction of ¥594 million in investment in securities.

Current liabilities settled at ¥55,189 million, up ¥19,838 million from September 30, 2007. This change reflects a ¥1,927 million drop in deposits from customers against a ¥18,137 million rise in short-term debt and a ¥1,105 million increase in income taxes payable.

Fixed liabilities were ¥24,565 million, down ¥3,633 million from September 30, 2007, which was almost completely due to a decline--at ¥3,270 million--in long-term debt.

Net assets amounted to ¥27,152 million, down ¥38 million from September 30, 2007, largely because a ¥1,297 million increase in minority interests arising from an boost in the net assets of FXO and the inclusion of FINTECH GIMV FUND, L.P., in consolidated accounting almost offset a ¥1,317 million decline in retained earnings.

Consequently, as of March 31, 2008, total assets stood at ¥106,906 million, total liabilities, at ¥79,754 million, and net assets, at ¥27,152 million. The equity ratio was 22.1%.

Cash Flow

Cash and cash equivalents (hereafter, "cash") at March 31, 2008, amounted to ¥12,142 million, down ¥3,020 million from September 30, 2007.

An analysis of cash flows for the first half of fiscal 2008 is presented below.

Net cash provided by operating activities came to ¥11,440 million, compared with ¥2,694 million in the corresponding period a year earlier. This sizable increase emerged despite a ¥5,883 million increase in inventory and the use of ¥1,927 million in deposits from FX (Foreign Exchange) customers, because of a ¥15,876 million decrease in loans receivable, trade through collection and the use of ¥1,789 million in FX (Foreign Exchange) business deposits.

Net cash used in investing activities amounted to ¥11,556 million, compared with ¥6,346 million in the corresponding period a year earlier. This moderate increase is primarily the result of ¥11,988 million in cash acquired, net of payment for purchase of newly subsidiaries, namely, equity taken in a silent partnership (*tokumei kumiai*) SPC coinciding with a review of the format applied to a large-scale project financing transaction.

Net cash used in financing activities reached ¥2,858 million, a turnaround from the ¥8,938 million in net cash provided by financing activities in the first half of fiscal 2007. The change in position is due to outflow of ¥895 million to pay dividends and ¥5,257 million to retire long-term debt, compared with inflow comprises a ¥1,637 million net increase in short-term debt and ¥567 million in proceeds from the issuance of common stock to minor shareholders.

Reference: Indicators of Cash Flow Status

(First half ended March 31, 2008, and fiscal years ended September 30, 2007, 2006, 2005 and 2004)

	2004	2005	2006	2007	2008 (First Half)
Shareholders' equity ratio (%)	44.9	42.6	40.6	27.6	22.1
Shareholders' equity ratio on a market value base (%)	—	968.6	195.1	46.8	12.2
Cash flow to liabilities with interest ratio (%)	128.3	—	—	—	356.1
Interest coverage ratio (times)	173.93	—	—	—	41.4

Notes:

- The indicators in the table above were calculated according to the following formulas, using data from the consolidated financial statements.
Shareholders' equity ratio: Shareholders' equity / Total assets
Shareholders' equity ratio on a market value base: Total market value of stocks / Total assets
Cash flow to liabilities with interest ratio: Liabilities with interest / Operating cash flow
Interest coverage ratio: Operating cash flow / Interest payments
 - Cash flow refers to operating cash flow or Cash Flows from Operating Activities, as listed in the Consolidated Statements of Cash Flows.
 - Liabilities with interest refer to all liabilities recorded on the consolidated balance sheets and for which interest is paid. Interest payments represent the amount of interest paid and appear on the Consolidated Statements of Cash Flows, under Cash Flows from Operating Activities as "Interest expenses".
- Shareholders' equity ratio on a market value base is not provided for fiscal 2004 because the Company was not yet listed as of September 30, 2004.
- Cash flow to liabilities with interest ratio and interest coverage ratios are not entered for the fiscal years ended September 30, 2005, 2006 and 2007 because the Company posted negative cash flows from operating activities in these years.
- Liabilities with interest for the cash flow to liabilities with interest ratio in fiscal 2007 and fiscal 2008 do not include the ¥22,170 million generated through the issue of ¥20,000,000,000 Zero Coupon Convertible Bonds due 2012 in February 2007 because these bonds are zero-coupon rated.

(3) Dividends and Basic Policy on Profit Distribution

Management prioritizes a dividend policy that returns profits to shareholders. But this objective is tempered by a commitment to maintain internal reserves at a level sufficient to quickly and properly reinforce the business base and to fund expanding operations. Therefore, management takes an overall perspective toward dividend amounts and considers such factors as fiscal results and future business development.

The formula for determining dividends ensures a payout ratio of 40%. Specifically, dividends will comprise a stable component equivalent to 20% of anticipated net income, as estimated at the beginning of the fiscal year, plus a performance-based component that weighs fiscal results against the stable component when non-consolidated net income reaches a certain benchmark.

In the event the stable dividend component exceeds 40% of non-consolidated net income in total, only the stable dividend component will be distributed to shareholders of record.

Under basic policy, a stable dividend component will be paid out twice a year, for interim and year-end settlements. The interim dividend will comprise only a stable dividend portion, and the year-end dividend will include a performance-based component tacked on to the stable dividend component.

Notwithstanding this objective, if certain unanticipated factors cause actual non-consolidated net income to differ from the estimate, the performance-based component may be revised, in consideration of such variables as fiscal results and operating environment.

In line with the aforementioned policy, the interim dividend—set at ¥165 per share for the first half of fiscal 2008—comprises only a stable dividend portion. The year-end dividend will include a performance-based component in addition to a ¥165 per share stable dividend portion. Currently anticipating that 40% of non-consolidated net income per share will not exceed the combined interim and year-end stable dividend portion of ¥330 per share, the Company will pay only the stable dividend portion at year-end as well.

4) **Business Risks**

Major risk factors with the potential to impact the business activities of the Group are described below. Risk factors that are not necessarily applicable to the Group's activities but may be important to investors in their decision-making plans have been included to enhance investor-oriented disclosure practices. Forward-looking statements are based on assumptions formed by executives of the Group from information current as of May 15, 2008.

a) Risks inherent in Expanding Operations

As of March 31, 2008, the Group employed 136 regular staff members as well as 12 casual and temporary staff members. More staff will be hired as operations expand, and internal control structures will be reinforced accordingly.

Any delay, however, in the establishment of a human resource structure appropriate to the scale operations caused by the inability to recruit additional staff as planned could hamper the execution of business activities under the Group umbrella and stall further expansion of current and future activities.

Furthermore, the business content of the Group is specialized and requires sophisticated know-how. A management priority is thus to attract and keep employees at a level that supports the Group's rate of growth.

Group companies intend to actively recruit people with excellent skills and provide appropriate in-house training, paralleling business development. If, however, existing personnel were to leave all at once, staffing needed by the Group were not adequately maintained, programs to train new employees were not properly implemented, or management controls failed to keep up with sudden organizational expansion, then the progress of corporate growth might slow or stop and business opportunities might be lost.

b) Risk associated with Licenses and Approvals

Depending on the structuring involved in asset securitization undertaken by the investment banking division, the Group is, or may be, subjected to certain legal restrictions. The Financial Instruments and Exchange Law, in particular, may require certain official procedures, such as the registration of scheme participants as traders of financial instruments, on structuring that falls under the scope of this law, which might then precipitate circumstances that impede the formation of structuring transactions or necessitate greater cost or more time than is usually expended in the execution of such transactions.

The amendment or abrogation of laws and regulations in the future by legislative bodies and political administrations and possible reinterpretation of laws and regulations by the respective authorities are developments that could possibly narrow the scope of activities that the Group is allowed to conduct, elevate the costs that must be borne to execute such activities, and prompt the appearance of new business risks. Such changes could impact Group performance and the viability of business pursuits now and yet to come.

Amended laws and ordinances, or reinterpretation of such legislation, as well as changes in structuring could, when the Company or members of the Group seek to acquire or renew licenses and other legally required approvals, necessitate the hiring of additional personnel and obligate the Company to reinforce overall compliance, including the establishment of a firewall, which would contribute to higher compliance-related expenses.

It is possible that material facts disclosed by the Company or advice extended by the Company, in accordance with such laws and the general principles stated in the Civil Code, may be perceived, respectively, as serious falsification or misrepresentation of data, or simply inaccurate. Even if the Company is not actually at fault, calls for compensation by alleged victims raises the risk of incurring substantial litigation costs and/or a tarnished reputation.

Violation of stated legislation could cause a delay in the execution of business activities, as the authorities investigate the alleged contravention, and the Group could also be subject to punishment, including fines, suspension of business and termination of licenses and approvals.

The Company, which was registered with the authorities as a beneficial rights trader in accordance with Article 86, Item 1 of the old Trust Business Law, is now recognized as a Type 2 financial instruments business—Kanto Local Finance Bureau License (registration) No. 1469 (Financial Instruments Trader (*kinsho*))—in accordance with Article 29 of the Financial Instruments and Exchange Law, pursuant to Supplementary Article 200, Item 1 of the Law for Partial Amendment of the Securities and Exchange Law, and trades certain financial instruments as part of asset securitization undertaken by the investment banking division.

The validity of a financial instruments business license is open-ended and therefore renewal is unnecessary. However, Article 29, Item 4 of the Financial Instruments and Exchange Law stipulates reasons for denying a license and Article 52 of the same law describes situations that warrant the cancellation of a license or the issuance of a business suspension order. As of this date, management knows of

no reasons or situations that would warrant the refusal or cancellation of the Company's license, but if the Company were to lose its license or be ordered to suspend operations, such developments would impede the execution of business activities and could adversely impact fiscal performance.

The Company is registered as a moneylender--Tokyo Government (2) License (registration) No. 28474--in accordance with Article 3, Item 1 of the Money-Lending Business Control and Regulation Law, which comprises regulations for loan business in Japan, and undertakes lending operations as part of asset securitization undertaken by the investment banking division. The Company's current moneylender's license is valid from April 29, 2007, to April 28, 2010.

Article 6 of the Money-Lending Business Control and Regulation Law stipulates reasons for denying a license and Article 37 and Article 38 of the same law describe situations that warrant license cancellation. As of this date, management knows of no reasons or situations that would prevent license renewal or cause cancellation of an existing license, but if the Company were unable to renew its license or loses an existing license for any reason whatsoever in the future, such status could impede the execution of business activities and could adversely impact fiscal performance.

Two consolidated subsidiaries are also registered as moneylenders: FinTech Principal Investment Incorporated, holding Tokyo Government (1) License (registration) No. 29731, the validity of which is from December 1, 2005, to November 30, 2008; and FGI Principal Co., Ltd., holding Tokyo Government (1) License (registration) No. 29399, the validity of which is from June 30, 2005, to June 30, 2008.

The Company is registered as real estate agent--Tokyo Government (1) License (registration) No. 88189--in accordance with Article 3, Item 1 of the Real Estate Transaction Business Law and pursues real estate transaction business as part of asset securitization undertaken by the investment banking division. The Company's current license as a real estate agent is valid from September 15, 2007, to September 14, 2012.

Article 5 of the Real Estate Transaction Business Law stipulates reasons for denying a license and Article 66 and Article 67 of the same law describe situations that warrant license cancellation. As of this date, management knows of no reasons or situations that would prevent license approval or cause cancellation of an existing license, but if the Company were unable to renew its license or loses an existing license for any reason whatsoever in the future, such status could impede the execution of business activities and could adversely impact fiscal performance.

Consolidated subsidiary FinTech Real Estate, Inc., is also registered as a real estate agent--Tokyo Government (1) License (registration) No. 84063--and its license is valid from January 22, 2005, to January 21, 2010.

Services of the Group not currently subject to legal regulations would require approvals and licenses and notification of intent if laws or ordinances are enforced at a future date. If the Group were unable to respond to such formalities, the business activities of the Company might suffer and fiscal performance could be adversely affected. At the current time, management is of the opinion that the Company and the Group would be able to respond appropriately to necessary procedures regarding any services that require new approvals and licenses as well as notification of intent paralleling revision of laws and ordinances.

c) *Risk of Dilution of Stock Price due to Exercise of Warrants*

The Company grants subscription rights as stipulated in Article 280-19 of the old Commercial Code, to members of the Company's Board of Directors, staff and qualified supporters, based on a special resolution passed at the ordinary shareholders' meeting held December 25, 2001, and stock acquisition rights to directors and staff of the Company and directors at subsidiaries and affiliates, as stipulated in Article 280-20 and Article 280-21 of the 2001 revision of the old Commercial Code, based on special resolutions passed at the extraordinary shareholders' meeting held June 16, 2004, and at ordinary shareholders' meetings held December 3, 2004, and December 20, 2005, and resolutions passed at special Board of Directors' meetings held December 1, 2004, December 14, 2004, December 2, 2005, and April 27, 2006. Stock acquisition rights are further granted to employees of the Company as stipulated in Article 236, Article 238 and Article 239 of the Company Law, based on a special resolution passed at the regular shareholders' meeting held December 20, 2006, and a resolution passed at a special Board of Directors' meeting held June 1, 2007.

Resolutions were passed at the annual general meeting of shareholders on December 20, 2007, regarding concrete details and remuneration amounts for stock acquisition rights issued to directors as stock options as well as assigning decision-making authority to the Board of Directors on subscription terms and conditions for stock acquisition rights issued to employees of the Company as stock options.

Management intends to maintain this structure. If currently surviving subscription rights and equity warrants are exercised, the action could dilute the per-share value of the Company's stock.

Compared with 1,207,985 shares outstanding, as of March 31, 2008, the number of residual securities of share warrants, based on the exercise of stock options, reached 55,255. This includes subscription rights without dilution effect. The Company has set out conditions, such as the period during which rights may be exercised and the number of shares that may be acquired through exercise of rights, in its “Agreement for Granting New Share Subscription Rights,” which is a contract between the Company and right holders.

In February 2007, the Company issued the ¥20,000,000,000 Zero Coupon Convertible Bonds due 2012 (hereinafter referred to as “Euroyen CB”), with par value of ¥22,170 million. The Company opted for a conversion price higher than market value to minimize dilution of earnings per share and tacked on a 120% conversion reserve clause to restrict the exercise of warrants. However, it is possible that the per-share value of the Company’s stock will be diluted when the warrants attached to this Euroyen CB are exercised.

Compared with 1,207,985 shares outstanding, as of March 31, 2008, the number of new shares to be issued, based on the exercise of warrants attached to this Euroyen convertible bond, stood at 139,785.

Consolidated subsidiaries have also issued equity warrants.

d) *Risks Affecting Fiscal Performance and Financial Position*

Five-Year Summary of Key Fiscal Results

Interim period ended March 31, 2008, and years ended September 30, 2007, 2006, 2005, 2004 and 2003.

(Thousands of yen)

Fiscal year	2003	2004	2005	2006	2007	2008 (Interim)
Consolidated						
Revenue	195,255	945,051	2,463,575	8,231,713	16,914,147	8,961,842
Ordinary profit (loss)	(20,168)	462,594	1,571,190	5,581,091	5,951,671	1,636,062
Net income (loss)	(72,486)	352,937	908,659	3,235,755	1,767,784	(415,505)
Net assets	(9,773)	663,164	3,427,073	24,957,929	27,191,098	27,152,757
Total assets	135,931	1,478,601	8,042,288	61,229,108	90,740,474	106,906,968
Number of employees (Average number of temporary employees) (persons)	8 (1)	11 (2)	30 (4)	55 (6)	129 (11)	136 (12)
Non-consolidated						
Revenue	195,255	945,051	2,463,575	7,544,427	7,287,612	3,477,969
Ordinary profit (loss)	(21,609)	463,834	1,603,975	5,480,380	3,731,105	885,872
Net income (loss)	(73,223)	354,215	930,533	3,234,627	1,806,623	226,235
Common stock	230,385	550,385	1,303,735	10,624,769	10,736,448	10,764,217
Net assets	(10,558)	663,657	3,449,440	24,896,403	24,950,236	24,319,816
Total assets	137,501	1,480,205	8,015,569	58,595,137	78,362,938	72,659,826
Number of employees (Average number of temporary employees) (persons)	8 (1)	11 (2)	23 (4)	42 (6)	78 (8)	82 (4)

Notes:

1. Revenue does not include consumption tax.
2. The average number of temporary employees is the annual average for casual staff and temporary staff.

Seeking to list its stock, the Company embarked on a business expansion plan in fiscal 2002, the fiscal year ended September 30, 2002. Until that point, the Company was essentially run by two people--Nobumitsu Tamai, current president and CEO, and Ken Fujii, then-chairman--and one or two large-scale structured finance transactions were sufficient to support operations.

Despite an increase in personnel and successful marketing in fiscal 2002, the Company posted a sizable loss that year, because many securitization transactions initiated that year required between six months and a year to complete and because some transactions were eliminated.

To clear prevailing challenges during this re-establishment phase and stabilize the revenue structure, the Company assumed concurrent execution of several transactions and worked to create a structure that would underpin greater efficiency in arrangement operations.

The Company has seen considerable growth in earnings since fiscal 2004, thanks to favorable demand for repeat transactions from existing clients and comparatively steady interest from new clients. Profitability has also improved, owing to the application of a more efficient process for undertaking requests.

In fiscal 2006, the Company entered the reinsurance/financial guarantee business and marked outstanding progress in its

principal finance operations through a dramatic increase in fund-procurement capacity.

In fiscal 2007, the Company posted a mixed performance. The acquisition of 45.0% equity in FXO added the fx (foreign exchange) business to the Company's corporate résumé and supported higher consolidated revenue. But profits fell. The Company was unable to close certain development-style securitization arrangement for a large-scale project as planned, and the appearance of other expenses caused non-consolidated revenue and profit to decline.

Fiscal 2007 results were also impacted by PITF (Practical Issues Task Force) No. 20, "Practical Solution on Application of Control Criteria and Influence Criteria to Investment Associations," issued by the Accounting Standards Board of Japan on September 8, 2006, which prompted the Company to include in the scope of consolidation SPCs set up with transactions arranged by the Company. Previously, such SPCs were excluded from consolidation.

Businesses need the finance industry, of which the Company is a part, to devise innovative financial instruments and financing schemes, and demand for related services is integral to further development of the Group. Therefore, past results alone may not provide all the data necessary for estimating future results. The business model applied by the Company is relatively new to Japan, and if the Company cannot establish solid competitive excellence in a relentlessly competitive environment, there is no guarantee that the Company can sustain revenue growth and high profitability. In addition, fiscal results can fluctuate widely, depending on the number of development-style securitized real estate arrangements undertaken and closed.

e) Market Environment Risk

Generally speaking, real estate is the most common asset used for securitization, and at FGI, real estate related products, such as development-style securitization, are the key components of the Company's current arrangement operations. Consequently, the Group's performance could be negatively influenced by certain trends in the real estate market and changes in legal and tax accounting regulations as applied to real estate securitization.

In a broader sense, the Company's business is affected by changing economic conditions and financial market status. But market upheaval and downturns can be triggered by more than just economic factors; events such as war, terrorism and natural disasters may also cause markets to turn sluggish. These events could adversely impact the fiscal results of the Group, because they could precipitate a sudden rise in interest rates. This would cause lending costs on financial arrangements to increase and possibly prevent FGI from completing transactions, which would erode profits.

Also of note, the U.S. subprime mortgage crisis has had lingering effects financial markets worldwide, exemplified by deteriorating liquidity and a credit crunch that reflects moves among financial institutions to tighten their limits on allowable risk. Still-unresolved problems associated with the subprime mortgage crisis may continue to influence trends in financial markets around the globe.

f) Client Risk

The Company's arrangement services generate income from SPCs, which are established to facilitate the securitization of a specific asset. Since each securitized transaction has its own SPC and thus the revenue provided through securitized transactions is limited to the respective SPC, it is essential that the Company work continuously to form new transactions for new clients. The success or failure of marketing activities could cause Group performance to vary.

g) Property Development Projects

Development projects for which the Group arranges financing may encounter delays in getting building permits and completing the construction of the buildings subject to financing. The primary causes of such delays are the discovery of toxins or environmentally harmful substances in or on the land, the unearthing of historic ruins, actions of neighborhood lobby groups, and directions or guidance by the authorities, any of which could appear before the developer obtains a building permit or during the construction process. Such events and subsequent delays could lower the recovery rate on investments and loans extended by the Group and thereby impact Group performance.

h) Principal Finance Risk

In principal finance operations, members of the Group act as suppliers of funds by investing in projects and extending loans to facilitate the structured finance transactions arranged by the Company.

If circumstances beyond the Group's control, such as deteriorating credit risk in the investment or lending targets or transaction participants, unfavorable changes in the market associated with the assets put up as collateral, or force majeure, such as earthquakes, were to occur, the investments and loans might not generate the anticipated returns or the amounts could be lost entirely.

Even when business trends are generally positive in the industry, losses could result, depending on the risk unique to each transaction and the risk inherent in the assets put up as collateral.

Changes in the principal finance balance—that is, investments and loans—are presented below.

Principal Finance Balance

Interim period ended March 31, 2008, and years ended September 30, 2007 and 2006.

	2006		2007		2008
	First Half	Second Half	First Half	Second Half	First Half
New transactions	37,340	31,720	26,438	45,182	24,805
Selling/refinance/arbitrage	5,344	39,617	24,558	31,882	38,760
Loans receivable, trade/ Investments in securities, trade	37,743	29,846	31,726	45,026	31,071

Note: Loans receivable, trade and investments in securities, trade are recorded separately on the Consolidated Balance Sheets.

Liquidity and swift fund procurement capabilities are indispensable to the Group's principal finance operations. The inability to maintain sufficient liquidity could prevent clients and partners from pursuing transactions with the Group. The Company, itself, has a short corporate history, so access to bank loans, which typically require a well-established credit history, is limited.

At the Group level, overall liquidity could be damaged by market upheaval, sluggish conditions in the real estate market and a tougher regulatory perspective by the authorities. When faced with such developments, financial institutions and investors would tend to lower their limits on allowable risk. Management issues that impact clients or third parties could also narrow Group liquidity.

I) Inventory Risk

The Group booked inventory of ¥39,695 million, up from ¥5,864 million at the end of September 2007, as property for sale on the consolidated balance sheets. The Group's policy is to dispose of the majority of buildings under property for sale as quickly as possible, but certain factors, particularly a decline in real estate prices, due to interest rate levels or deteriorating market conditions, could lead to evaluation losses or losses on disposal.

J) Fund Management Risk

Group companies Stellar Capital and Crane Reinsurance, which are involved in the reinsurance/financial guarantee business, undertake fund management activities. Investment instruments such as marketable securities are exposed to such risks as price, interest rate and exchange rate volatility.

If the investment environment, including market trends, underwent a major shift, huge evaluation losses and forex losses could result. The business results of the Group and its financial standing could be adversely affected.

k) Competition Risk

Generally speaking, people with experience in structured finance—the Group's forte field—are few and far between in the finance industry as a whole.

The Company boasts an efficient service structure that hinges on a small team of people rather than an excessively large non-marketing division to promote resourceful business development. This structure makes it possible to respond cost-effectively to the need for small-scale, low-profit transactions and ensures the Company's ability to offer services to midsized business groups as well as major corporations.

However, competition over transactions would intensify if a mega financial group, based either in Japan or abroad, were to expand into the specialized realm that the Group currently profiles, if a boutique-type investment bank providing services similar to those offered by the Group were established with access to expert knowledge, such as that amassed by former employees of the Company, or other companies enter this business and successfully overcome entry barriers, namely the need for service efficiency, a skilled workforce and standardized financial technologies. Heightened competition could hurt the Group's performance.

l) *Outdated Financial Technology Risk*

The Company continually strives to keep its financial technologies innovative and cutting-edge. But financial technologies touch on law, accounting, taxation, statistics and mathematics, and daily changes to any aspect will cause the overall technologies to evolve, so failure to consistently upgrade or replace existing financial technologies and apply improvements to marketable financial products could lead to outdated and less competitive financial technologies in use. If this happened, the Company's performance could be severely reduced.

m) *Risks pursuant to the Reinsurance/Financial Guarantee Business*

In the reinsurance and financial guarantee business, certain members of the Group underwrite on risk inherent in arrangements packaged by the Group—credit enhancement—as well as rent guarantees and coverage for household effects. The risks involved in underwriting credit enhancement and insurance are far greater than the risks incurred in arrangement operations. If actual losses were to exceed profits in the reinsurance/financial guarantee business or conditions in international insurance markets were adversely affected by terrorist acts or other events with major consequences, the fiscal performance of the Group and its financial position could be seriously impacted.

n) *Risks associated with Strategic Investments, Mergers, Joint Ventures and Entry into New Businesses as well as Aspects of Uncertainty*

The Group seeks to reinforce its core business through internal expansion and development as well as through strategic investments, mergers and joint ventures (hereafter, collectively referred to as "M&As").

Various risks and uncertainties emerge in the execution of M&As, including issues associated with management systems, the consolidation and integration of relevant services and systems, the standardization of accounting and data-processing systems, and relationship adjustments with clients and business partners. It may be difficult to achieve desired levels of synergy, M&A-efficiency and cost reduction.

A great deal of weight is placed on systems, administration and personnel in determining the success of a joint venture, but such aspects of a business are not under the Company's complete control. In addition, conflicts and differences of opinion between joint venture partners and participating Group members could hurt the Group's overall business prospects. Another concern is the possible dilution of existing shares caused by the issue of new shares upon the realization of a merger or the establishment of a joint venture.

Vast resources are expended to reinforce current operations, enter new businesses and create new products, and these efforts may incur considerable but unexpected losses, costs and monetary obligations. Business expansion and the pursuit of mergers and joint ventures obviously require management's attention, but the concentration of management expertise in these areas leaves a gap in other areas. Lopsided allocation of resources—both monetary and executive—could weaken the Company's capital and equity positions and oversight capabilities, which could in turn seriously effect Group management.

The Group intends to extend structured finance operations to targets in markets other than the real estate market. The successful establishment of a presence in other markets hinges on the ability to accurately identify demand for structured finance in each market. If efforts fail, the Group's performance and its financial position could suffer.

o) *Business and Financial Risks Caused by the Acquisition of Equity in FX Online Japan*

In January 2007 and again in March of the same year, the Company purchased stock in FXO, a young, unlisted company, and made it a consolidated subsidiary. FXO provides online forex margin trading services to individuals, a business focus that holds tremendous growth potential.

However, the Group's investment in FXO is considerable, given the scale of the Group's operations, and the business activities of FXO could exert a major negative impact on the Group's business as a whole for the following reasons.

- 1) Regardless of the vast investment by FGI to acquire shares in FXO, the returns expected by FGI on its investment may not be achieved if the business undertaken by FXO does not go in the direction that FGI was led to believe the company would pursue.

- 2) Along with the purchase of stock in FXO, the FGI Group assumed about ¥7.3 billion in goodwill. This amount was derived by deducting FXO's net assets from the amount paid for FXO stock and will be amortized over five years, from April 2007. Management expects FXO to generate profits in these five years that exceed the amortization amount, but this performance is not guaranteed. If FXO's business activities do not proceed as planned, the Group might have to record as a loss all or part of the unamortized amount that still remains at that time, which could have a significantly detrimental impact on the performance of the Group.
- 3) FXO has achieved rapid growth using a revolutionary business model that debuted upon the company's establishment in 2002. But the company's corporate governance structure, including internal control systems, is still under development since rapid business expansion is not over yet. That is, a final governance structure is difficult to implement as long as business is growing at the current rate.

Consequently, efforts to enhance corporate governance and recruit the necessary personnel could cause expenses to bloom. Moreover, failure to implement a suitable corporate governance structure could prompt regulatory action by the relevant authorities.

In its provision of online services to individuals, FXO handles a diverse range of confidential information, including personal data, in accordance with Japanese law. If the company were to violate such laws and regulations, including inappropriate handling of personal data, the company would be subject to regulatory action, which could severely tarnish the company's reputation.

In addition, the company relies heavily on service providers for both hardware and software. If these service providers, which have no capital alliances with the company, fail to provide accurate, uninterrupted services, FXO might sustain serious damage to the continuity of its own services.

FXO has enjoyed a steady increase in client numbers but violent fluctuations in exchange rates could lead to major losses for clients, which might cause the company's client base to crumble.

p) *Risks related to Restrictive Financial Covenants*

Some of the loans members of the Group have taken from financial institutions carry restrictive financial covenants based on the value of net assets recorded on the consolidated and non-consolidated balance sheets at the interim and year-end settlements each business year and on ordinary profit recorded on the consolidated and non-consolidated statements of income at the year-end settlement each business year. If these amounts run counter to stated covenants, the Company will forfeit profits up to the limit claimed by the lending bank, or banks. Should this occur, other lending banks might also claim a certain amount of profits and demand immediate repayment of the full amount of respective loans. This could have a seriously disadvantageous outcome on the performance and financial position of the Group.

If certain events of default were to appear in regard to the February 2007 issue of Euroyen CB -- total par value of ¥22,170 million -- with stock acquisition rights due in 2012, the trustee may, at its discretion, call for the immediate redemption of said bonds and will notify the Company of this decision, and if bondholders having more than one-quarter of the surviving face value of the bonds when events of default appear request notification of a decision to seek the forfeiture of profits within the limits of said bonds or an extraordinary resolution by bondholders indicates that such a request will occur, the trustee will notify the Company of forfeiture of profits within the limits of said bonds.

Should such a scenario come to pass, the Company might be forced to redeem the entire amount early, which could seriously erode the Group's performance and financial position.

q) *Risk of Reliance on Liabilities with interest*

Members of the Group involved in principal finance operations acquire some of the funds used in this activity through loans from financial institutions. The ratio of liabilities with interest to total assets stood at 19.3%, at September 30, 2006, 28.8%, at September 30, 2007, and 38.1%, at March 31, 2008, indicating an upward trend. Principal finance operations are one wheel of the investment banking cart--the other being arrangement services, which the Company has undertaken since before its stock listing--and have become a key source of profit.

The higher liabilities with interest ratio at March 31, 2008, is largely due to an increase in short-term loans taken by a silent partnership (*tokumei kumiai*) SPC with property to develop--booked as inventory--that was brought under consolidation because of an equity investment by an FGI subsidiary following a review of the format applied to the large-scale project financing transaction for which this same SPC was established.

Accordingly, if current interest levels change, the Group's performance and financial position could be affected. But interest rates on the funds extended through principal finance operations would also rise, so the impact of higher interest rates is not necessarily all bad.

However, the inability to acquire loans from banks, as planned, could impact the execution of business activities, so the Group will actively seek to diversify its fund-procurement methods.

r) Impact Associated with Outstanding Investment by SP&W Asclepius Investment Partnership No. 4

On December 20, 2007, consolidated subsidiary SP&W Asclepius Investment Partnership No. 4, a voluntary partnership (Nini Kumiai) under the Civil Code, contributed ¥2.2 billion into a financing scheme. The investment was to be repaid by March 21, 2008, but as of the disclosure date of these materials on first-half results, the amount remains outstanding.

Through a series of transactions, the investment was backed by listed stock, the market value of which stood at about ¥1.9 billion on March 31, 2008. A preservative attachment is possible at a certain percentage.

Members of the Group involved in this situation remain committed to recovering the finance receivable, but a quick collection of the entire amount is unlikely, so the Company has set aside an amount from reserve for doubtful accounts.

The listed stock provided as collateral carries legal risk associated with executing collateral as well as market risk, such as price movement. Therefore, the inability to recover—fully or partially—the finance receivable could severely erode the Group's business results and financial standing.

II. Group Status

The Group comprises FinTech Global Incorporated (FGI), 21 consolidated subsidiaries and five unconsolidated subsidiaries and operates as a boutique-type investment bank.

FGI is at the core of the Group. Unlike megabanks, which offer various services over a diverse financial spectrum, the Company focuses solely on structured finance and pursues high-level, specialized investment banking services.

Major subsidiaries are described below.

FinTech Global Securities, Inc. (FGS), acts as an agent for special investors to provide products, such as privately placed funds registered overseas, and to handle private placement of domestic securitized transactions.

FinTech Real Estate, Inc. (FRE), seeks to capitalize on real estate related profit opportunities, such as brokerage and silent partnership (Tokumei-Kumiai) investments, that derive from arrangements put together by FGI.

Entrust, Inc., offers major national and regional rental housing management companies in Japan services to guarantee rent in the event tenants are in arrears.

Switzerland-based Group member Stellar Capital AG provides final underwriting on Entrust's guarantees to facilitate one-stop services for property management companies who are clients of the FGI Group. Stellar Capital itself underwrites credit enhancement facilities incorporated into certain arrangements packaged by FGI.

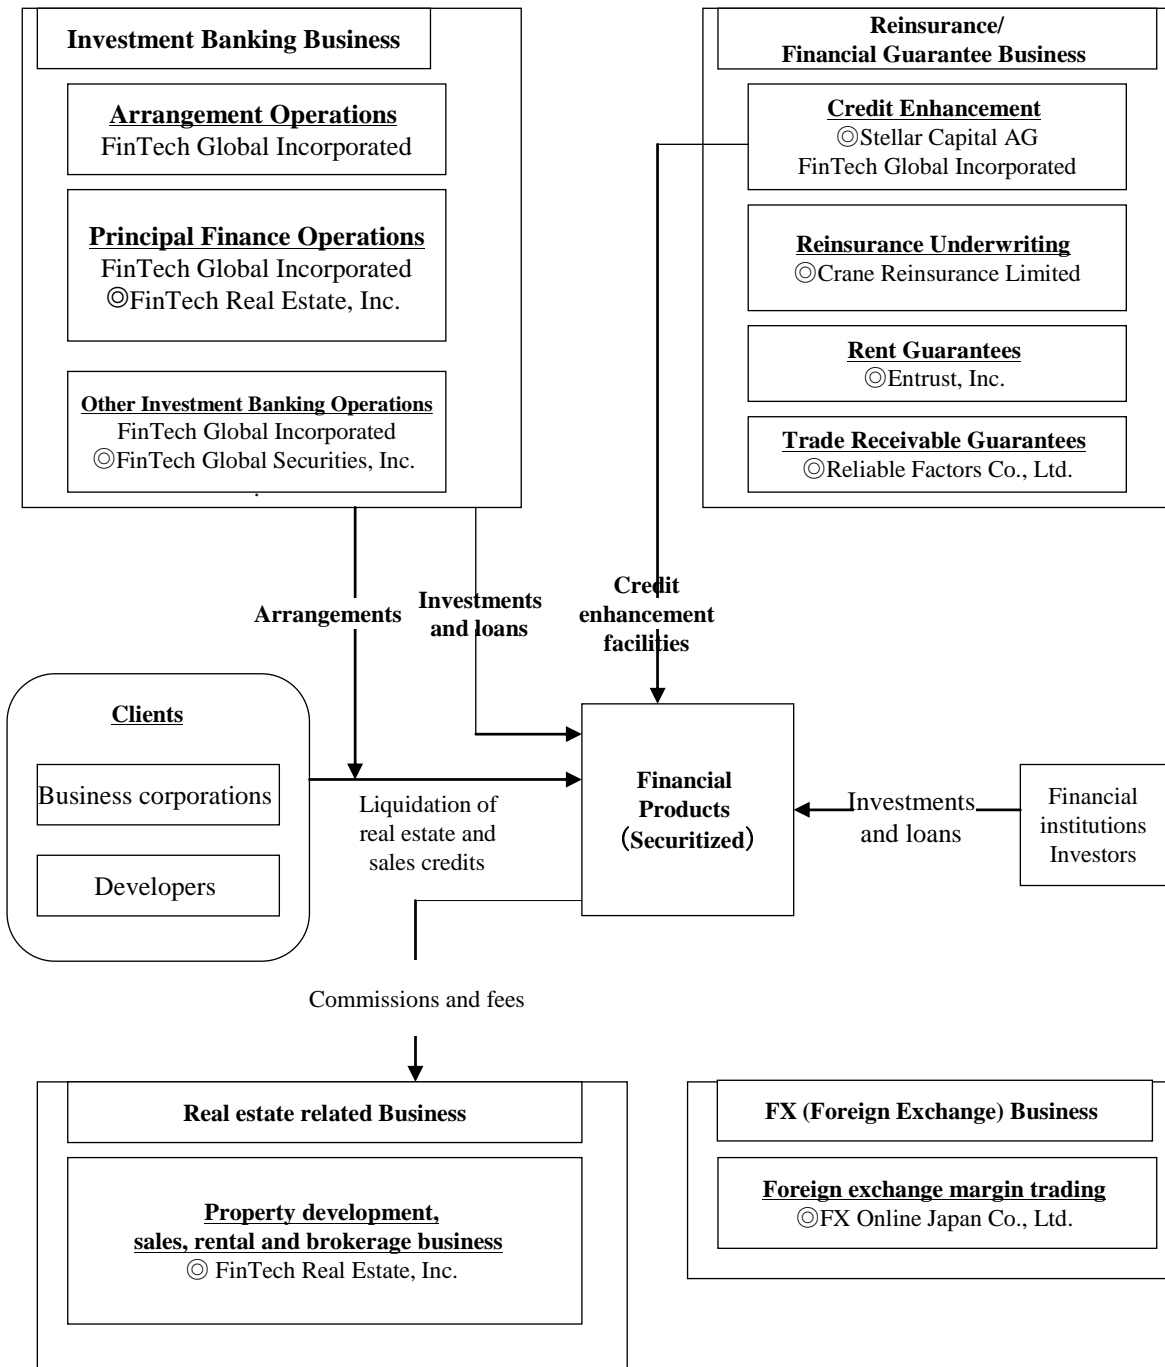

Crane Reinsurance Limited, operating in Bermuda, underwrites reinsurance, primarily policies held by major property management companies in Japan to cover the household affects of tenants.

FX Online Japan Co., Ltd. (FXO), was brought into the Group as a consolidated subsidiary through the purchase of stock in January 2007 and March 2007 for an aggregate equity holding of 44.99%. The company is engaged in online forex margin trading.

Reliable Factors Co., Ltd., provides guarantees on trade receivables.

In the first half of fiscal 2008, FINTECH GIMV FUND, L.P., a venture fund targeting investment in Japanese and overseas venture companies specializing in technology sectors, particularly information and communications, new materials and life sciences, and SP&W Asclepius Investment Partnership No. 4 were designated specified subsidiaries.

A composition chart showing the activities undertaken by the Group is presented on the next page.

Note: © indicates a consolidated subsidiary

III. Management Policy

(1) Basic Direction

FGI's raison d'être is to make companies in all industries aware of the benefits to be gained through innovative structured finance services. As a boutique-type investment bank, the Company seeks to address wide-ranging financing needs with original, leading-edge financial products and schemes geared to the changing financial environment. Through risk-hedging and credit enhancement utilizing insurance and guarantee facilities, FGI demonstrates its core competence—maximizing financial possibilities for each client.

In the FX (Foreign Exchange) business, a financial service for individuals, the spotlight is on high-quality products, true value and complete transparency. FGI aims to reinforce FXO's reputation as a provider of services that elicit satisfaction and peace of mind.

(2) Indicators of Business Performance

Primarily because of the changing business content of Group activities and new accounting treatment standards, management decided to make return on equity (ROE) and the debt-to-equity ratio key indicators of business performance for the Group, effective from fiscal 2008.

The medium- to long-term target for ROE is 15%, which will be achieved through a continued emphasis on high-revenue-generating arrangement fees to boost profitability, and through enhanced investment and loan turnover.

The debt-to-equity ratio will replace the shareholders' equity ratio used previously as an indicator of stability. The goal will be to maintain a level appropriately matched to changes in the scope of business and evolving risk amounts.

(3) Medium- to Long-term Management Strategies

a) Main Products

The Company's main products are securitized real estate transactions, particularly securitized property development transactions, and arrangements for bridging loans, which carry projects through pre-development stages. However, access to funds for real estate applications, especially from foreign-owned financial institutions, narrowed suddenly when the financial fire kindled by the subprime mortgage crisis adjustment phase after several boom years. Given these factors, FGI was forced to in the United States spread to financial markets worldwide.

Compounding matters, the real estate market itself appears to have entered an apply tougher screening standards and a more selective approach to the projects for which it agrees to arrange financing.

Meanwhile, in-house research indicates that external fund suppliers with sizable capacity—reinforced with oil money and pension funds in developed countries—are eyeing Japanese real estate, which is considered a comparatively inexpensive investment. In addition, office vacancy rates in city centers are low overall. Both situations confirm demand is still firm despite the outward signs of gloom in the real estate market.

It is therefore difficult to imagine that the adjustment phase will be a protracted one, and as real estate prices stabilize, the need for development-type securitization will resurface.

The development-type securitization arranged by FGI grants access to a rich source of future transactions, such as brokerage and sales, and thereby enables the Company to capitalize on all possible profit opportunities in addition to the initial arrangement services.

Against this operating backdrop, FGI will strive to improve its arrangement processing capacity by hiring more employees and upgrading their skills through education and training programs. Efforts will also be directed toward aggressively cultivating business opportunities that lead to real estate related arrangements, a forte field. Careful selection of projects for which arrangements are packaged will ensure suitable risk-return.

The Company will also shift its business focus from financing for large-scale projects to more reliable small and medium-sized projects and strive to broaden its client base.

b) Developing New Products

The popularity of securitized real estate transactions, a mainstay product for FGI, has paved a solid business foundation for the Company. To build on this and ensure management and fiscal performance stability, FGI will aggressively apply management resources, mainly personnel assets and financial capacity, to the development of new products and, more specifically, products that hit a chord with the market.

In this effort, the Company will prioritize credit enhancement services, an area of specialization that integrates aspects of financing

and insurance, design structured financing that secure profits even during the price adjustment phase that characterizes the real estate market today, and allocate management resources to the development of structured financing suitable to applications outside of real estate.

c) Principal Finance

With improved financial capabilities, FGI has capitalized on opportunities to execute principal finance, thereby boosting its investment and loan balance. Given its inability to close the large-scale project finance transaction in fiscal 2007 because of the credit crunch triggered by the subprime mortgage crisis, the Company will emphasize efforts to complement funds from existing lenders with direct contributions from investors at home and abroad, and shift securitization of principal loans off the balance sheet through sales and arbitrage, thereby squeezing total assets--that is, preventing a decline in return on assets (ROA) and stemming a rise in liabilities--while securing profits through arbitrage transactions.

d) Reinsurance/Financial Guarantee Business

The Group offers direct credit enhancement and guarantee services through Switzerland-based guarantee provider Stellar Capital and Japan-based rent guarantee provider Entrust, both subsidiaries of the Company, and reinsurance underwriting services on quality insurance risks, such as domestic policies covering household effects, through Bermuda-based reinsurer Crane Reinsurance. FGI will encourage stronger ties between these companies and external guarantee and insurance companies to diversify profit opportunities in this business segment.

(4) Issues Requiring Attention

a) Diversification of Fund Contributions and Securitization of Principal Finance Credits

Securing stable lenders is imperative to arrangement operations, and in light of the fact that the credit crunch triggered by the subprime mortgage crisis hampered FGI's ability to close certain large-scale project finance transaction planned for fiscal 2007, the Company will seek to create a system that facilitates fund procurement directly from mezzanine- and equity-oriented investors at home and abroad to complement funds from existing lenders, namely financial institutions

The securitization of principal finance credits was postponed, but the structure that would allow the booking of results is now in use. The tasks in fiscal 2008 are to further reinforce this structure and aggressively promote securitized principal finance credits to make the Group's investment banking business more efficient and boosting ROA and ROE.

b) Developing New Products

Securitized real estate transactions will remain a mainstay product for the Group, but the Company will apply management resources, namely personnel assets and financial capacity, to actively pursue research and development and accelerate the introduction of new products. The spotlight will be on credit enhancement services, an area of specialization in that integrates aspects of finance and insurance.

c) Securing Skilled Personnel and Enhancing Their Talents

To address diversifying needs for structured finance, the Company will emphasize measures to enhance the talents of star employees through on-the-job training and cultivate the capabilities of mid-level employees, who form the backbone of operations. The Company will also maintain in-house structures fully consistent with the internal controls reporting system described in the Financial Instruments and Exchange Law. This system goes into effect from fiscal 2009.

d) Group Companies

FGI will continue to encourage improvements in Group management, reassess business plans and strive to effectively utilize groupwide management resources. Where necessary, a scrap-and-build perspective will prevail.

e) Risk Management

From fiscal 2008, FGI has implemented risk management based on a quantification of risk and return and seeks to boost its ability to respond to changes in financial and real estate markets.

No one would say the financial climate is rosy and adjustments still characterize the real estate market. Given these factors, the

Company will take to a higher level the screening standards it uses to pinpoint suitable projects for structured financing. In addition, risks controlled independently by each operating division will be viewed from an overall perspective to achieve management stability and an even fiscal performance.

As part of this effort, FGI carried out an organizational restructuring, effective April 1, 2008, that included the creation a credit officer, a full-time position assigned to the general manager of the Credit Department.

6. Cash and Cash Equivalents	For the purpose of the interim consolidated statement of cash flows, the Company considers all highly liquid investments with an insignificant risk of changes in value and with original maturities of three months or less to be cash equivalents.	Same as at left	For the purpose of the consolidated statement of cash flows, the Company considers all highly liquid investments with an insignificant risk of changes in value and with original maturities of three months or less to be cash equivalents.

Changes in Important Items to Prepare Interim Consolidated Financial Statements

Interim Fiscal 2007 (From October 1, 2006 to March 31, 2007)	Interim Fiscal 2008 (From October 1, 2007 to March 31, 2008)	Fiscal Year 2007 (From October 1, 2006 to September 30, 2007)
<p>(Financing expenses)</p> <p>Financing expenses on the loans associated with individual investments or financings had been classified as cost of revenue and financing expenses on the loans which could not be traced to individual fund requirement had been classified as other expenses. However, due to increasing the ratio of the financing expenses which could not be traced to individual fund requirement, the Company has decided to allocate financing expenses of the companies providing with the lending services to properly present cost of revenue and other expenses, since the interim fiscal 2007.</p> <p>In allocating those expenses, the total assets are categorized as operating assets and other assets. Based on the ratio of these two categories of assets, the financing expenses are classified as the cost of revenue and other expenses, respectively, on the interim consolidated statement of income. Along with the change, “bank loans, trade” is reclassified to “short-term debt” or “long-term debt” based on the term of payment.</p> <p>As a result of the change, the operating income have decreased by ¥122,008 thousand compared to what would have been reported under the previous presentation, but there is no impact on the ordinary profit in the interim consolidated statements of income.</p> <p>Current liabilities have decreased by ¥705,000 thousand, and long-term liabilities have increased by the same amount.</p> <p>In the interim consolidated statement of cash flows, cash flows from operating activities have decreased by ¥1,315,675 thousand and cash flows from financing activities have increased by the same amount.</p> <p>Additionally, as for the breakdown of cash flows from operating activities, interest expenses included in the cost of revenues and in other expenses are combined and classified as to “cost of fund and interest expenses”.</p>	<p style="text-align: center;">—————</p>	<p>(Financing expenses)</p> <p>Financing expenses on the loans associated with individual investments or financings had been classified as cost of revenue and financing expenses on the loans which could not be traced to individual fund requirement had been classified as other expenses. However, due to increasing the ratio of the financing expenses which could not be traced to individual fund requirement, the Company has decided to allocate financing expenses to properly present cost of revenue and other expenses, since the fiscal year 2007.</p> <p>In allocating those expenses, the total assets are categorized as operating assets and other assets. Based on the ratio of these two categories of assets, the financing expenses are classified as the cost of revenue and other expense, respectively, on the consolidated statement of income. Along with the change, “bank loans, trade” is reclassified to “short-term debt” or “long-term debt” based on the term of payment.</p> <p>As a result of the change, the operating income have decreased by ¥174,567 thousand compared to what would have been reported under the previous presentation, but there is no impact on the ordinary profit in the consolidated statements of income.</p> <p>Current liabilities have decreased by ¥565,000 thousand, and long-term liabilities have increased by the same amount.</p> <p>In the consolidated statement of cash flows, cash flows from operating activities have increased by ¥2,699,325 thousand and cash flows from financing activities have decreased by the same amount.</p> <p>Additionally, as for the breakdown of cash flows from operating activities, interest expenses included in the cost of revenues and in other expenses are combined and classified as to “cost of fund and interest expenses”.</p>

Interim Fiscal 2007 (From October 1, 2006 to March 31, 2007)	Interim Fiscal 2008 (From October 1, 2007 to March 31, 2008)	Fiscal Year 2007 (From October 1, 2006 to September 30, 2007)
(Stock options) On December 27, 2005, Accounting Standard Boards of Japan (“ASBJ”) issued “Accounting Standard for Stock Options” and related guidance. As a result of this change, there is no impact on income and losses in the interim consolidated financial statements compared to what would have been reported under the previous accounting standard.	—	(Stock options) On December 27, 2005, Accounting Standard Boards of Japan (“ASBJ”) issued “Accounting Standard for Stock Options” and related guidance. The new standard and guidance are applicable to stock options newly granted on and after May 31, 2006. As a result of this change, there is a minimal impact on income and losses in the consolidated financial statements compared to what would have been reported under the previous accounting standard.

Changes in Presentation

Interim Fiscal 2007 (From October 1, 2006 to March 31, 2007)	Interim Fiscal 2008 (From October 1, 2007 to March 31, 2008)
(Note to interim consolidated statements of income) From the interim fiscal 2006, the Company discloses “Stock distribution costs,” which was presented as “Stock issue costs” in the interim fiscal 2005.	—

Notes to Interim Consolidated Statements of Changes in Net Assets

Interim Fiscal 2007 (From October 1, 2006 to March 31, 2007)

1. The type of issued stock and number of shares, the type of treasury stock and the number of shares

Type of stock	Number of shares as of September 30, 2006	Increases	Decreases	Number of shares as of March 31, 2007
Issued stock Common stock	236,622	955,163	-	1,191,785

(Reasons for changes)

The increases in number of shares were resulted from the following:

A 5-for-1 stock split on October 1, 2006	946,488 shares
Exercise of stock acquisition rights (stock options)	8,675 shares

2. Stock acquisition rights

Name of company	Details	Type of stock to be issued	Number of shares to be issued for the stock acquisition rights				Balance as of March 31, 2007 (Thousands of yen)
			As of September 30, 2006	Increases	Decreases	As of March 31, 2007	
FinTech Global Incorporated	Stock acquisition rights on the third series of bonds issued in April 2006	Common stock	22,222.22	-	22,222.22	-	-
	Stock acquisition rights on the Euro-yen denominated bonds issued in February 2007	Common stock	-	139,785	-	139,785	-
Total			22,222.22	139,785	22,222.22	139,785	-

Notes: 1. Number of shares to be issued for the stock acquisition rights represents the maximum number of shares derived through the exercise of stock acquisition rights.

2. Reasons for changes in number of shares

Decrease in number of shares for stock acquisition rights issued in April 2006 was resulted from the early redemption of those bonds.

Increase in number of shares for stock acquisition rights on the Euro-yen denominated bonds issued in February 2007 was a result of issuance of ¥20,000,000,000 Zero coupon convertible bonds due in 2012.

3. Dividends

(1) Dividends paid

Resolution	Type of stock	Total dividends (Thousands of yen)	Dividend per share (Yen)	Record date	Effective date
General shareholders' meeting on December 20, 2006	Common stock	¥1,183,110	¥5,000	September 30, 2006	December 21, 2006

(2) Dividends of which the record date falls in the current interim fiscal year but the effective date falls in the following interim fiscal year.

Resolution	Type of stock	Source of dividends	Total dividends (Thousands of yen)	Dividend per share (Yen)	Record date	Effective date
Board of directors' meeting on May 15, 2007	Common stock	Retained earnings	¥655,481	¥550	March 31, 2007	June 14, 2007

Interim Fiscal 2008 (From October 1, 2007 to March 31, 2008)

1. The type of issued stock and number of shares, the type of treasury stock and the number of shares

Type of stock	Number of shares as of September 30, 2007	Increases	Decreases	Number of shares as of March 31, 2008
Issued stock Common stock	1,202,560	5,425	-	1,207,985

(Reasons for changes)

The increases in number of shares were resulted from the following:

Exercise of stock acquisition rights (stock options) 5,425 shares

2. Stock acquisition rights

Name of company	Details	Type of stock to be issued	Number of shares to be issued for the stock acquisition rights				Balance as of March 31, 2008 (Thousands of yen)
			As of September 30, 2007	Increases	Decreases	As of March 31, 2008	
FinTech Global Incorporated	Stock acquisition rights on the Euro-yen denominated bonds issued in February 2007	Common stock	139,785	-	-	139,785	-
	Stock acquisition rights (stock options)		-	-	-	-	11,556
Total			139,785	-	-	139,785	11,556

Notes: 1. Number of shares to be issued for the stock acquisition rights represents the maximum number of shares derived through the exercise of stock acquisition rights.

3. Dividends

(1) Dividends paid

Resolution	Type of stock	Total dividends (Thousands of yen)	Dividend per share (Yen)	Record date	Effective date
General shareholders' meeting on December 20, 2007	Common stock	¥901,920	¥750	September 30, 2007	December 21, 2007

(2) Dividends of which the record date falls in the current interim fiscal year but the effective date falls in the following interim fiscal year.

Resolution	Type of stock	Source of dividends	Total dividends (Thousands of yen)	Dividend per share (Yen)	Record date	Effective date
General shareholders' meeting on May 15, 2008	Common stock	Retained earnings	¥199,317	¥165	March 31, 2008	June 13, 2008

Fiscal Year 2007 (From October 1, 2006 to September 30, 2007)

1. The type of issued stock and number of shares, the type of treasury stock and the number of shares

Type of stock	Number of shares as of September 30, 2006	Increases	Decreases	Number of shares as of September 30, 2007
Issued stock Common stock	236,622	965,938	-	1,202,560

(Reasons for changes)

The increases in number of shares were resulted from the following:

A 5-for-1 stock split on October 1, 2006	946,488 shares
Exercise of stock acquisition rights (stock options)	19,450 shares

2. Stock acquisition rights

Name of company	Details	Type of stock to be issued	Number of shares to be issued for the stock acquisition rights				Balance as of September 30, 2007 (Thousands of yen)
			As of September 30, 2006	Increases	Decreases	As of September 30, 2007	
FinTech Global Incorporated	Stock acquisition rights on the third series of bonds issued in April 2006	Common stock	22,222.22	-	22,222.22	-	-
	Stock acquisition rights on the Euro-yen denominated bonds issued in February 2007	Common stock	-	139,785	-	139,785	-
	Stock acquisition rights (stock options)	Common stock	-	-	-	-	4,974
Total			22,222.22	139,785	22,222.22	139,785	4,974

Notes: 1. Number of shares to be issued for the stock acquisition rights represents the maximum number of shares derived through the exercise of stock acquisition rights.

2. Reasons for changes in number of shares

Decrease in number of shares for stock acquisition rights on the third series of bonds issued in April 2006 was resulted from the early redemption of those bonds.

Increase in number of shares for stock acquisition rights on the Euro-yen denominated bonds issued in February 2007 was a result of issuance of ¥20,000,000,000 Zero coupon convertible bonds due in 2012.

3. Dividends

(1) Dividends paid

Resolution	Type of stock	Total dividends (Thousands of yen)	Dividend per share (Yen)	Record date	Effective date
General shareholders' meeting on December 20, 2006	Common stock	¥1,183,110	¥5,000	September 30, 2006	December 21, 2006

	Bought	124,243,141	124,145,451	(97,690)

Note: Gains or losses on deemed settlements are recorded in the "Fair market value" above.

(Thousands of yen)

Item	Type	Contract amount	Fair market value	Unrealized gain (loss)
Equity securities	Option sold	169,607	257,915	(88,307)
	Option bought	0	0	0

Notes: 1. Market value is calculated based on the prices presented by the correspondent financial institution, etc.

2. Contract amount is not actual transaction value with trading partners, and thus does not present the market risk associated with derivatives instruments.

3. Derivative instruments to which hedge accounting were applied are excluded from above table.

Fiscal 2007 (From October 1, 2006 to September 30, 2007)

(Thousands of yen)

Item	Type	Contract amount	Fair market value	Unrealized gain (loss)
Currency	Foreign exchange margin tradings			
	Sold	173,318,030	172,104,843	1,213,187
	Bought	171,169,448	172,108,905	939,457

Note: Gains or losses on deemed settlements are recorded in the "Fair market value" above.

Stock Options

Interim Fiscal 2007 (From October 1, 2006 to March 31, 2007)

1. Amount and account used to recognize expenses

Certain consolidated subsidiaries granted treasury stock options during the interim fiscal 2007. The treasury stock options granted by the consolidated subsidiaries were accounted for by the intrinsic value method, instead of the value method, allowed for privately held companies in accordance with the "Accounting Standards for Stock Options." No expense was recognized for the treasury stock options granted by the consolidated subsidiaries because intrinsic value at the grant date was estimated at zero.

2. Outline of treasury stock options

The granted treasury stock options were omitted from the interim fiscal 2007 because they have immaterial impact on the Company's financial position and business results.

Interim Fiscal 2008 (From October 1, 2007 to March 31, 2008)

1. Amount and account used to recognize expenses

(Thousands of yen)

Cost of revenue: Stock compensation expense ¥ 197
Selling, general and administrative expenses: Stock compensation expense ¥ 6,382

2. Outline of stock options granted during the period

Not applicable

Fiscal 2007 (From October 1, 2006 to September 30, 2007)

1. Amount and account used to recognize expenses

(Thousands of yen)

Cost of revenue: Stock compensation expense ¥ 246
Selling, general and administrative expenses: Stock compensation expense ¥ 4,728

Certain consolidated subsidiaries granted stock options during the fiscal 2007. The stock options granted by consolidated subsidiaries and treasury stock options were accounted for by the intrinsic value method, instead of the fair value method, allowed for privately held companies in accordance with the "Accounting Standards for Stock Options." No expense was recognized for the stock options granted by the consolidated subsidiaries and treasury stock options because intrinsic value at the grant date was estimated at zero.

Required service period	September 10, 2007 to March 31, 2009
Exercise period	April 1, 2009 to September 30, 2016
Exercise price	50,000
Fair value at the grant date	-

Notes: (*1) The number of stock options is converted into the number of shares.

(*2) The number of stock options is adjusted with a 5-for-1 stock split on December 20, 2004, a 3-for-1 stock split on December 20, 2005 and a 5-for-1 stock split on October 1, 2006.

(*3) Those who are entitled to exercise the stock acquisition rights can exercise up to the percentage in each required service period described in the "Category" below.

	Category	Required service period	Fair value unit price
A	The period from June 4, 2009 to June 3, 2010 is up to 40% of all of the shares in the stock acquisition rights granted	June 4, 2007 to June 3, 2009	¥31,129
B	The period from June 4, 2010 to June 3, 2011 is up to 70% of all of the shares in the stock acquisition rights granted, totaling the number of shares in the stock acquisition rights exercised from June 4, 2009 to June 3, 2010.	June 4, 2007 to June 3, 2010	¥32,065
C	The period from June 4, 2011 to June 3, 2012 is up to 90% of all of the shares in the stock acquisition rights granted, totaling the number of shares in the stock acquisition rights exercised from June 4, 2009 to June 3, 2011.	June 4, 2007 to June 3, 2011	¥32,917
D	The period from June 4, 2012 to November 30, 2016 is all of the unexercised stock acquisition rights.	June 4, 2007 to June 3, 2012	¥33,688

(*4) Other than that, 370 shares of treasury stock options (the number of treasury stock options is covered into the number of shares and includes 333 shares of the Company) were granted to 2 shareholders, including the Company, and one partnership. Because the 370 shares were granted solely for maintaining the population ratio of voting rights and do not represent any consideration, they are not disclosed on the table.

3. Godo Kaisha Tempu Moderate Udagawa-cho Kaihatsu, which has been consolidated in accordance with "Practical Solution on Application of Control Criteria and Influence Criteria to Investment Association" (PITF No. 20 issued by ASBJ on September 8, 2006), sold the real estate held for sale for the year ended September 30, 2007. As a result, ¥3,658,511 thousand of revenue, ¥2,678,603 thousand of operating expenses, and ¥979,908 thousand of operating income to the third party in Japan are recognized.

3. Overseas Sales

Interim Fiscal 2007 (From October 1, 2006 to March 31, 2007)

Because sales overseas correspond to less than 10% of total sales, the information regarding overseas sales was omitted from the interim fiscal 2007.

Interim Fiscal 2008 (From October 1, 2007 to March 31, 2008)

Because sales overseas correspond to less than 10% of total sales, the information regarding overseas sales was omitted from the interim fiscal 2008.

Fiscal Year 2007 (From October 1, 2006 to September 30, 2007)

Because sales overseas correspond to less than 10% of total sales, the information regarding overseas sales was omitted from the fiscal 2007.

Per Share Information

Changes in Important Items to Prepare Interim Non-Consolidated Financial Statements

Interim Fiscal 2007 (From October 1, 2006 to March 31, 2007)	Interim Fiscal 2008 (From October 1, 2007 to March 31, 2008)	Fiscal Year 2007 (From October 1, 2006 to September 30, 2007)
<p>(Financing expenses)</p> <p>Financing expenses on the loans associated with individual investments or financings had been classified as cost of revenue and financing expenses on the loans which could not be traced to individual fund requirement had been classified as other expenses. However, due to increasing the ratio of the financing expenses which could not be traced to individual fund requirement, the Company has decided to allocate financing expenses of the companies providing with the lending services to properly present cost of revenue and other expenses, since the interim fiscal 2007.</p> <p>In allocating those expenses, the total assets are categorized as operating assets and other assets. Based on the ratio of these two categories of assets, the financing expenses are classified as the cost of revenue and other expenses, respectively, on the interim non-consolidated statement of income. Along with the change, “bank loans, trade” is reclassified to “short-term debt” or “long-term debt” based on the term of payment.</p> <p>As a result of the change, the operating income have decreased by ¥122,008 thousand compared to what would have been reported under the previous presentation, but there is no impact on the income before income taxes and minority interests in the interim non-consolidated statements of income.</p> <p>Current liabilities have decreased by ¥705,000 thousand, and long-term liabilities have increased by the same amount.</p>	<p style="text-align: center;">—————</p>	<p>(Financing expenses)</p> <p>Financing expenses on the loans associated with individual investments or financings had been classified as cost of revenue and financing expenses on the loans which could not be traced to individual fund requirement had been classified as other expenses. However, due to increasing the ratio of the financing expenses which could not be traced to individual fund requirement, the Company has decided to allocate financing expenses to properly present cost of revenue and other expenses, since the fiscal 2007.</p> <p>In allocating those expenses, the total assets are categorized as operating assets and other assets. Based on the ratio of these two categories of assets, the financing expenses are classified as the cost of revenue and other expense, respectively, on the consolidated statement of income. Along with the change, “bank loans, trade” is reclassified to “short-term debt” or “long-term debt” based on the term of payment.</p> <p>As a result of the change, the operating income have decreased by ¥174,567 thousand compared to what would have been reported under the previous presentation, but there is no impact on the income before income taxes and minority interests in the consolidated statements of income.</p> <p>Current liabilities have decreased by ¥565,000 thousand, and long-term liabilities have increased by the same amount.</p> <p>(Stock options)</p> <p>On December 27, 2005, Accounting Standard Boards of Japan (“ASBJ”) issued “Accounting Standard for Stock Options” and related guidance. The new standard and guidance are applicable to stock options newly granted on and after May 31, 2006. As a result of this change,</p>

Interim Fiscal 2007 (From October 1, 2006 to March 31, 2007)	Interim Fiscal 2008 (From October 1, 2007 to March 31, 2008)	Fiscal Year 2007 (From October 1, 2006 to September 30, 2007)
		there is a minimal impact on income and losses in the non-consolidated financial statements compared to what would have been reported under the previous accounting standard.

Changes in Presentation

Interim Fiscal 2007 (From October 1, 2006 to March 31, 2007)	Interim Fiscal 2008 (From October 1, 2007 to March 31, 2008)
	<p>(Note to interim non-consolidated balance sheets)</p> <p>From the interim fiscal 2008, the Company discloses “cost on uncompleted contracts,” which was previously presented as “work in process.”</p> <p>In the interim fiscal 2007, “Short-term loans receivable” were included in “Others” under Current assets. However, from the interim fiscal 2008, “Short-term loans receivable” were separately shown since the amount surpassed more than 5 percent of total assets. “Short-term loans receivable” amounted to ¥2,320,000 thousand as of March 31, 2007.</p>
