### **Update to notice regarding snow damage to facility**

Tokyo, May 11, 2016—In the press release “Notice regarding snow damage to facility,” dated February 22, 2016, FinTech Global Incorporated (hereafter, “FGI” and “the Company”) acknowledged that a solar power generation facility owned by the Company had sustained damage in a heavy snowfall. Management has determined that the damage will indeed have an effect on business results. Details are provided below.

#### **Particulars**

A solar power generation facility purchased by FGI for sale sustained some damage from a heavy snowfall. Subsequently, the Company undertook an assessment to determine the extent of damage, verified the need for repairs and reinforcement work, and has estimated the cost to restore the facility. Efforts were taken to reduce the amount of loss through negotiations with suppliers of facility equipment on the cost of restoration work. Management also anticipates a large portion of the loss to be covered by insurance, so the burden of loss carried by the Company is likely to be around ¥5 million. This amount has been booked under expenses for the second quarter.

For details about how the loss will impact business results, please refer to “Summary of Financial Statements for the First Two Quarters of Fiscal 2016 (under Japanese GAAP), (Consolidated Basis)” and “Notice regarding differences between results for the first two quarters of the current fiscal year and the corresponding period a year ago,” both disclosed today.
