#### 1. Qualitative Information on Business Results and Financial Position

#### (1) Business Results

In the first two quarters—October 1, 2019 to March 31, 2020—of the fiscal 2020 consolidated accounting period for FinTech Global Incorporated (FGI) ending September 30, 2020, Metsä posted mixed results. Beginning in November 2019, various measures were implemented, leading to a guest count of 314,000 in the first quarter of fiscal 2020, up 19.8% over the previous quarter, that is, the fourth quarter of fiscal 2019. But in the second quarter, steps to halt the spread of COVID-19 prompted a temporary closure of Moominvalley Park for 16 days in March 2020, which caused a 28.3% drop in the guest count, comparing to the first quarter, to 225,000. In the investment banking business, arrangements, investment exits and aircraft asset management services moved in a favorable direction.

Consolidated performance for the first two quarters of fiscal 2020 was underpinned by steady investment banking business and two quarters' worth of operating revenues from Moominvalley Park, which opened in March 2019 and therefore contributed to the consolidated results from the beginning of fiscal 2020, and despite factors, such as lost opportunities due to temporary park closure and the exclusion of a public management consulting subsidiary from consolidation. At the result, revenues climbed 30.3% year on year, to ¥4,269 million. Cost of revenues rose 27.6% year on year, to ¥2,968 million, but gross profit nevertheless jumped 36.8% year on year, to ¥1,301 million, due to solid revenue status. Selling, general and administrative expenses dropped 25.7% over the corresponding period a year ago, to ¥1,796 million, as Metsä pre-opening expenses booked in the first two quarters of the previous fiscal year were no longer a factor, and the business also showed a decrease in one-time expenses and personnel expenses. Consequently, the consolidated operating loss was a much lighter shade of red, at ¥495 million, compared with ¥1,467 million a year ago, and the ordinary loss followed a similar path, amounting to ¥560 million, compared with ¥1,567 million a year ago. While FGI still reported a loss attributable to owners of parent, at ¥581 million, for the first two quarters of fiscal 2020, the loss was not as deep as it was a year ago, at ¥1,244 million. The amount for the first two quarters of fiscal 2020 reflects the booking of ¥71 million in fixed expenses (including personnel expenses and depreciation expenses) during the temporary closure of Moominvalley Park as well as a ¥73 million quarterly loss attributable to non-controlling interests.

A breakdown of performance by business segment is presented below. Revenues include intersegment revenues and transfers. Note "Other" is no longer required because Adacotech Incorporated, which had been included under Other—a business segment that is not included in reporting segments—was removed from the scope of consolidation, effective from the third quarter of fiscal 2019.

### a. Investment Banking Business

In the investment banking business, as arrangement and aircraft asset management services moved in a favorable direction, FGI exited asset investment and corporate investment deals. This led to a 1.7% year-on-year improvement in revenues, to ¥1,404 million. The segment recorded a valuation loss of ¥360 million on corporate investment during the first two quarters of fiscal 2019 but this dropped to ¥12 million in the period under review. Although still in a loss position, the segment was able to shrink its loss to ¥35 million from ¥404 million a year ago.

# **b. Public Management Consulting Business**

In the public management consulting business, the public accounting business directed efforts into marketing activities to promote consultations for creating financial documents based on unified standards for local governments as well as contract services, including preparation of financial analysis reports, introduction of public enterprise accounting and the formation of management strategies for public enterprises. The regional revitalization business focused on contract services, including discussions pursuant to the introduction of public-private partnership/public financial initiative techniques to meet anticipated growth in demand.

On July 1, 2019, FGI sold some of the shares the Company held in Geoplan Namtech, which undertakes business related to urban infrastructure maintenance services. As a result, the company became an affiliate accounted for by the equity method and was removed from the scope of consolidation as of the fourth quarter of fiscal 2019.

The segment saw revenues tumble 71.6%, to ¥128 million, and posted a loss of ¥13 million, reversing from ¥76 million in income in the first two quarters of fiscal 2019.

## c. Entertainment Service Business

In the Metsä business, the emphasis was on measures to increase the guest count and improve earnings. Beginning in November 2019, various approaches were implemented to provide a richer array of services and content that would give guests a feeling of greater satisfaction from their Metsä experience. The approaches included free parking on weekdays, the debut of one-day passes, a more appealing schedule of events, the distribution of Story Guide pamphlets and the installation of Story Door stations where guests watch a short video introduction to Moomin stories. Then, aligned with these approaches, Moominvalley Park revised the content and price of admission tickets, effective March 14, 2020. Unfortunately, Moominvalley Park was closed for 16 days in March 2020 in an effort to help stop the spread of COVID-19, and even when the site reopened, many people who might have visited under different circumstances were reluctant to venture outside for non-essential activities. This stay-at-home or stay-close-to-home attitude impacted the Metsä business, with the second-quarter guest count falling 28.3% comparing to the first quarter, to 225,000 people, and Metsä-related revenues tumbling 37.1%, to ¥800 million, from the preceding quarter. As a result, Metsä-related revenues could have been much higher but were held to ¥2,071 million, up 125.1%, year on year.

In the licensing business, efforts were directed into expanding sublicensing services to provide exclusive access to Moomin characters in Japan. This facilitated "Moomin: The Art and the Story," a

selection of original Moomin artwork that began traveling around Japan April 2019 and has attracted about 240,000 people across four venues — Tokyo, Oita, Ishikawa and Nagoya — so far. Also, through the sale of anime broadcasting rights, a new TV anime series premiered on NHK BS4K, a channel operated by Japan's national broadcaster using an ultra-high definition 4K image system, in April 2019 and continues to air, including reruns of previously aired episodes. During the first two quarters of fiscal 2020, episode streaming and sales and rental of the series on Blue-ray Disc and DVD began. Coinciding with news of the Moominvalley Park opening, Moomin characters have garnered increasing attention, fueling the capture of new contracts with 17 companies since October 2019 and pushing licensing revenues up 28.2% year on year, to ¥778 million.

Despite lost revenue opportunities due to the temporary closure of Moominvalley Park in March 2020, the site contributed the consolidated results from the beginning of the fiscal 2020 because of the opening on March 16, 2019. This fuller contribution along with higher licensing revenues propelled segment revenue 82.3% year on year, to ¥2,850 million. Without the burden of costs incurred ahead of the opening of Metsä in the first two quarters of fiscal 2019, the segment loss for the first two quarters of fiscal 2020 was lighter, at ¥160 million, compared with ¥691 million.

# (2) Consolidated Financial Position

#### Assets

Total assets at the end of the second quarter on March 31, 2020 stood at ¥17,453 million, down 8.3% from the end of fiscal 2019 on September 30, 2019. The change reflects decreases of ¥281 million in cash and time deposits, ¥117 million in investments in securities, trade due to progress on the sale of real estate beneficiary rights, ¥301 million in real estate for sale due to exits (sale) on real estate development projects, ¥662 million in accrued consumption tax included in under other current assets following a refund of consumption tax, and ¥59 million in buildings and structures, net due to depreciation and amortization of buildings and interior and exterior fixtures at Moominvalley Park.

#### Liabilities

Total liabilities amounted to ¥9,317 million at the end of the second quarter on March 31, 2020, down 8.2% from the end of fiscal 2019 on September 30, 2019. The change is mainly due to an increase in of ¥134 million in long-term loans payable, which was overshadowed by decreases of ¥452 million in the current portion of long-term loans payable and ¥294 million in short-term loans payable following repayment of borrowed money due to exits on real estate development projects.

#### Net assets

Net assets reached ¥8,135 million at the end of the second quarter on March 31, 2020, down 8.3% from the end of fiscal 2019 on September 30, 2019. This change is largely due to decreases of ¥629 million in retained earnings due to the booking of a quarterly loss attributable to owners of parent and ¥99 million in non-controlling interests.

(3) Information on Forward-Looking Statements, including Consolidated Performance Forecasts Management feels the spread of COVID-19 is likely to continue to impact the Group's business activities and business results, as described below in "Impact of COVID-19 pandemic on business activities and business results." The situation makes it difficult for management to form a realistic consolidated performance forecast for fiscal 2020, ending September 30, 2020, at the present time. Consequently, the fiscal 2020 forecast has yet to be determined. Management will carefully track factors impacting business results and quickly disclose a forecast as soon as the situation allows for a more accurate estimate.

#### Impact of COVID-19 pandemic on business activities and business results

The novel coronavirus, which emerged in Wuhan, Hebei Province, in China, in December 2019, spread beyond the initial hotspot to the rest of China and to other countries all over the world, including Japan. The impact of COVID-19 — the illness caused by the novel coronavirus — on the business activities and business results of the FGI Group are presented below.

#### **Investment Banking Business**

(Arrangement services, including arrangements and asset management, and asset investment)

Existing asset management projects are, at the current time, unlikely to be significantly affected by the COVID-19 disaster. But some projects will require a review of investment management strategy to address facility characteristics. For a few asset management projects, including those for which FGI has contributed capital, contracts were drawn up in the second quarter for the sale of buildings, and payment is expected this fiscal year. Going forward, if investors take a more cautious investment stance on sourcing for new projects and existing investments, the situation could impact FGI's business results.

#### (Corporate investment)

Portfolio companies in some industries have been affected by the COVID-19 pandemic, with consequences that include downtime. Also, with regard to investment exits, restrictions have been put in place on in-person meetings with investors, which impacts the process of negotiations. Going forward, if investors take a more cautious investment stance, the situation could impact exit activity. For new investments, the policy will be to consider prevailing economic conditions and be very selective in choosing investment targets, but the potential exists for business revitalization investments.

#### (Aircraft asset management)

Demand for advisory services related to aircraft maintenance and technology is, at the current time, not expected to change significantly.

# **Public Management Consulting Business**

The focus of this business is primarily to provide support to local governments and other public entities on the preparation of financial documents, and the impact on activities is expected to be minimal.

#### **Entertainment Service Business**

(Metsä)

In Metsä operations, Moominvalley Park has been temporarily closed since March 2, 2020 (excluding the period from March 14 through March 27), out of consideration for the well-being of guests and operating staff. Metsä Village has also been closed, since April 8, 2020, after the Japanese government declared a state of emergency. On May 4, 2020, the national government extended the country's state of emergency order to May 31, 2020, and measures thus remain in force in Saitama Prefecture, which is one of the prefectures where specific precautions have been implemented. The restart of operations at Metsä is conditioned upon exclusion from the state of emergency zone and a lifting of the state of emergency order and will be determined with full consideration of other factors as well. Management is looking into restarting operations at Metsä Village, a commercial facility, first.

The public has taken stay-at-home recommendations to heart, and this reluctance to venture outside for non-essential activities along with closure of Moominvalley Park and Metsä Village has had an impact on business results, including a decrease in revenues in the second quarter compared with the first quarter as well as an extraordinary loss of ¥71 million. The segment loss is likely to be worse in the third quarter, compared with the second quarter, because the site will have been closed for a longer period of time than in the second quarter.

#### (Licensing Business)

The travelling exhibition of original Moomin artwork was set to open in Iwate for an April-to-May 2020

engagement but was cancelled, and separate merchandise events planned at multiple venues were also cancelled. Going forward, the situation may impact events and other programs or presentations. In addition, there has been an impact on the licensing business from the closure of stores operated by licensees and large commercial facilities such as department stores, which are a key marketing channel for Moomin-related merchandise. But efforts will be made to reinforce marketing channels, including online sales, as well as product categories where demand is likely to grow.
